

Aerlan

IMPROVING PERFORMANCE

Jacquard Textile, together with our design partners in Italy, are continually dedicating time and energy to research and develop a range of new characteristics. These help to add significant value to our products and offer reassurance to our customers that the fabrics really can perform.

Aerlan

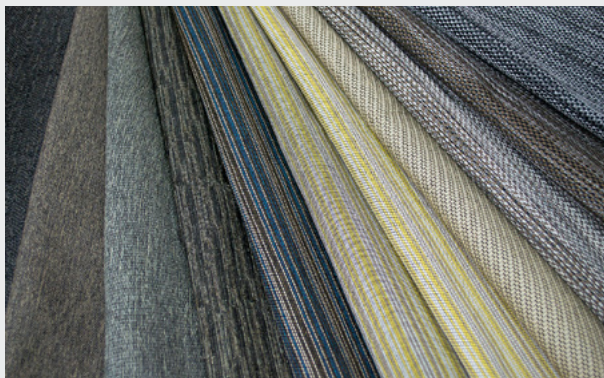

In order to make textiles for mattresses that are truly innovative we have created a new yarn made up of extremely fine filaments to obtain a single voluminous yarn. Fabric using this yarn offer a wide range of unique looking fabrics both in terms of design and colour.

How it works

- Aerlan is a truly innovative yarn made up of many extremely fine filaments arranged in an irregular fashion to obtain a single, voluminous yarn. The air trapped between the fibers allows an excellent level of thermal insulation.
- The spaces between the filaments allow a high level of aeration and permeability to vapour. This improve levels of hygiene, softness to touch and natural feel.

Benefits

- Softness
- Lightness
- High thermal insulating quality
- High aeration capacity Hygiene
- Extremely wash-resistant
