

Aloe Vera

WELLNESS

Wellness is more than just a buzzword for well-being, vitality and fitness. It has become a social phenomenon which confers the wish of 'eternal youth' – wellness is a new life philosophy and the commercial aspect is being employed as an important pulse generator and growth motor in many industries.

Aloe Vera

Aloe Vera, best known for its natural healing properties, has been used for various medicinal purposes by ancient civilisations for thousands of years.

Containing more than 100 biologic compounds, Aloe Vera protects and regenerates skin as well as offering anti-bacterial and anti-fungal properties. In addition, an Aloe Vera finish provides a 'softening sensation' to the fabric surface – all delivering a very pleasant sleeping environment and ensuring better sleep.

How it works

- Invisible micro-beads containing Aloe Vera extract attach themselves to the fabric surface.
- The beads can work with the body's natural movements to release Aloe Vera.

Benefits

- Soothes and regenerates the skin
- Provides anti-bacterial and anti-fungal properties
- Creates a softer fabric surface
