

Organic

NATURAL LIVING

Nowadays there is more and more talk about the importance of nature and the environment. We feel a strong desire to surround ourselves with natural products and live in harmony with the world around us. In response we have a complete collection of fabrics with natural yarns provided by Mother Nature.

Organic Cotton

Organically grown cotton is processed without the use of chemical fibres, solvents and toxic dyes that are typical of most modern fabrics. We often think of all cotton as 'natural', yet globally, conventional cotton uses 25% of all insecticides and 10% of all pesticides.

Our bodies are constantly fighting the toxins found in the products around us. With organic cotton bedding you help

create environments in your home that allow the body's defense system a chance to recuperate. This makes organically grown cotton ideal for those seeking healthier choices.

How it works

- Parent cotton plants are produced without the use of genetically modified organisms.
- Crop rotation, green manure and compost helps to maintain soil.
- Organic weed management promotes weed suppression.
- Pest control ensures beneficial insects replace pesticides.
- Fully biodegradable detergents to clean the fibres.

Benefits

- Safe, relaxing sleeping environment
- Healthy
- Environmentally friendly
